

JULIO LIMA COSTA VALLADARES

Senior Frontend Engineer | TypeScript, Vue.js & Real-Time Systems

Brazil | 22992531720 | juliolima1225@gmail.com | linkedin.com/in/juliolimacostavalladares

PROFESSIONAL SUMMARY

Results-driven Senior Frontend Engineer with extensive experience building high-performance, **real-time**, and **low-latency** web platforms. Expert in **TypeScript** and **Vue.js**, with a proven track record of designing scalable architecture, modular package setups, and event-driven data flows. Highly skilled in optimizing browser-based **video streaming** and real-time communication systems (**WebSockets**, **SSE**). Passionate about utilizing AI tools to accelerate development workflows, maintain rigid code quality, and build intuitive user experiences.

PROFESSIONAL EXPERIENCE

Senior Frontend Developer | Greenn *May 2025 – March 2026 (11 months) | Rondon, PR, Brazil*

- **Real-Time Architecture:** Implemented a real-time event-driven stack utilizing **Socket.io**, **SSE**, and streaming protocols to support 12,000 concurrent users without latency bottlenecks.
- **Video Pipeline Optimization:** Optimized the generation and loading pipeline for dynamic avatars and video media, achieving a 47% reduction in browser loading and processing times.
- **Generative AI Leadership:** Led the frontend architecture for a pioneering global AI application capable of autonomous video course generation in under 1 hour, delivering 320+ courses in 4 weeks with an 8.9/10 NPS.
- **Voice Cloning System:** Integrated advanced neural models to deploy a high-fidelity voice cloning feature (97% accuracy) requiring only 10 seconds of input audio.
- **Dynamic LMS Interface:** Designed and developed a Netflix-style learning experience with a dynamic recommendation algorithm that increased student retention by 42% and generated R\$11,500+ in initial revenue.

Senior Frontend Developer | Locaweb *February 2023 – May 2025 (2 years 4 months) | Brazil*

- **Meta API Integrations:** Engineered the frontend integration of Meta's Embedded Signup for WhatsApp Business, automating setup for 500+ enterprise accounts monthly and increasing approval rates from 72% to 98%.
- **Headless Architecture & Resiliency:** Managed and maintained highly resilient, headless web architectures ensuring 99.7% uptime and strict policy compliance for large-scale enterprise clients like Nike, Natura, Magalu, and Telhanorte.
- **Email Builder Development:** Developed a responsive drag-and-drop template editor using the **MJML** framework, which boosted email open rates by 35% and checkout conversion rates by 22%.
- **Conversion Optimization:** Implemented behavior-triggered retention mechanisms and cart-recovery modules, processing 12,000 daily triggers to recover 27% of abandoned checkouts.

Mid-Level Frontend Developer | Hivelabs *January 2022 – February 2023 (1 year 2 months) | Remote*

- **Marketing Automation Apps:** Built the user interface and technically integrated the "Campanhas Inteligentes" WhatsApp marketing application on the Tray platform, simplifying official Meta API features for SMBs.
- **Interactive Recovery Flows:** Created simplified UI wizards allowing merchants to set up automated abandoned cart recovery flows in a few clicks, leading to direct ROI increases.
- **Messaging System UX:** Designed and refined configuration flows for secure WhatsApp integrations, improving usability while maintaining strict message delivery compliance.
- **Ecosystem Growth:** Contributed to making the integration app one of the highest-rated tools in the Tray App Store, managing thousands of conversion events daily.

Junior Frontend Developer | Wx3 *May 2020 – January 2022 (1 year 9 months) | Nova Friburgo, RJ, Brazil*

- **Next.js Migration:** Led the transition of legacy jQuery e-commerce frontends to modern, search-optimized **Next.js** architectures with **Server-Side Rendering (SSR)**.
- **Core Web Vitals Optimization:** Enhanced overall page performance by 82%, achieving optimal "green" scores on all Google metrics (LCP, FID, CLS) across multiple deployments.
- **Traffic Scalability:** Improved organic SEO rankings by 43% and sustained 6 months of zero-error runtime operations through traffic spikes that reached 4x normal system capacity.

TECHNICAL SKILLS

- **Programming Languages:** TypeScript, JavaScript (ES6+), HTML5, CSS3
- **Frameworks & Libraries:** Vue.js (Vue 3, Composition API), React.js, Next.js, TailwindCSS, MJML
- **Real-time & Media:** WebSockets, Socket.io, Server-Sent Events (SSE), Video Streaming, Low-latency video interfaces
- **Tooling & Architecture:** pnpm workspaces, Monorepos, Vite, RESTful APIs, Git, Headless Architecture, Core Web Vitals Optimization
- **AI Tools & Cloud:** Cursor AI, Gemini CLI, Google Cloud AI

EDUCATION

- **Information Technology Course** | Firjan SENAI (August 2019 – August 2020)
- **Information Technology Course** | Firjan SENAI (2019)
